# Super Parfait™ Raspberry Pinks

***Dianthus 'Super Parfait Raspberry'***

Plant Height:  6 inches

Flower Height:  8 inches

Spread:  12 inches

Spacing:  8 inches

Sunlight:

Hardiness Zone:  3

Other Names:  Border Pinks, Cheddar Pinks

**Description:**

Eye catching scarlet-pink flowers with deep crimson centers rise above mounds of fine foliage on strong stems; great for flower arrangements; very floriferous with a tidy, uniform habit; sturdy, resilient and easy to grow; excellent in containers

**Ornamental Features**

Super Parfait Raspberry Pinks is blanketed in stunning fragrant scarlet frilly flowers with hot pink overtones and crimson eyes at the ends of the stems from mid spring to mid summer. The flowers are excellent for cutting. Its attractive grassy leaves remain green in color throughout the year.

**Landscape Attributes**

Super Parfait Raspberry Pinks is an herbaceous evergreen perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Super Parfait Raspberry Pinks is recommended for the following landscape applications;

- General Garden Use
- Container Planting

**Planting & Growing**

Super Parfait Raspberry Pinks will grow to be only 6 inches tall at maturity extending to 8 inches tall with the flowers, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Super Parfait Raspberry Pinks is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
