Plant Height: 8 inches

Flower Height: 12 inches

Spread: 18 inches

Spacing: 15 inches

Sunlight: ○ ◐ ●

Hardiness Zone: 3

Other Names: Coralbells, Alumroot

Group/Class: Heureka Series

Description:

This selection forms a compact mound of stunning, rose flushed silver foliage with gray-green veins, and hot pink undersides; presents amazing contrast to other plants; flowers are insignificant; great versatility; keep soil moist in heat of summer

Ornamental Features

Heureka Silver Lord Coral Bells is primarily valued in the garden for its distinctive form, with the flower stalks towering over the foliage. It attractive crinkled lobed leaves remain silver in color with distinctive grayish green veins and tinges of pink throughout the year.

Landscape Attributes

Heureka Silver Lord Coral Bells is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Heureka Silver Lord Coral Bells is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Heureka Silver Lord Coral Bells will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 15 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant performs well in both full sun and full shade. However, you may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Heureka Silver Lord Coral Bells is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
